

Cal OES Daily Situation Report

June 30, 2015

Beat The Heat!!!

Plan accordingly for the Hot weather and keep your loved ones safe.

Do NOT leave Kids, Pets or anyone in a car.

Studies show that temps inside a car can reach dangerous levels in just a few minutes. Leaving the windows open does not significantly decrease the heating rate.

Checklist

- ✓ **Reduce activities**
between 11am – 4pm
- ✓ **Wear light clothes**
white and loose
- ✓ **Eat light foods**
avoid heavy meals
- ✓ **Drink water**
Do not drink alcohol
and limit caffeine.
- ✓ **Avoid too much sun.**
Sunburn reduces your
body's ability to
dissipate heat.

SITUATION SUMMARY

Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

Weather of Concern

- Temperatures will continue to rise through Wednesday as a ridge of high pressure shifts westward over California. Temperatures will peak Wednesday with highs reaching into the low 100s over inland areas.
- Excessive Heat Watch in effect from Wednesday afternoon through Friday morning for northern and central Sacramento Valley
- NWS Reno advises: Given the unusual amount of moisture in the atmosphere, localized heavy rain and flash flooding, especially over the recent burn areas can be expected. The Washington Fire burn area in Alpine County could flash flood very quickly with debris flow impacts to firefighters and Highways 4/89. Isolated severe storms containing strong outflow winds, frequent lightning, and hail are also possible.

WEATHER SYNOPSIS BY REGION:

WEATHER

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

Very hot afternoon high temperatures across interior northwest California will persist through the work week. Late night and morning coastal cloudiness will give way to afternoon sunshine.

Medford Weather:

Daily records will likely be broken with Thursday being the hottest day.

Reno Weather:

Hot temperatures will return this week as high pressure strengthens over the Great Basin. Moisture will remain trapped underneath ridge will allow for a chance of thunderstorms each afternoon through the 4th of July weekend.

San Francisco Weather:

A significant warming trend will continue across inland areas through Wednesday as high pressure builds over the western United States. Moisture will also make its way for Wednesday into Thursday which could also lead to a few showers and thunderstorms.

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Sacramento Weather:

Very hot weather can be expected for the remainder of the week. Some sierra thunderstorms throughout the week, though some may move into portions of the valley late in the week.

Hanford Weather:

Monsoonal moisture continues to flow over the area producing showers and isolated thunderstorms to the desert and mountain/foothill areas through Thursday. Otherwise partly cloudy skies and above average temperatures continue to persist.

WEATHER SYNOPSIS BY REGION:

WEATHER

SOUTHERN CALIFORNIA:

Los Angeles Weather:

A warm and humid air mass will continue over the area throughout the week as high pressure remains over the Great Basin. Southeast flow aloft moist and unstable air will continue a slight chance of thunderstorms and shower over the mountains and deserts. A cooling trend is expected toward the weekend as low pressure approaches.

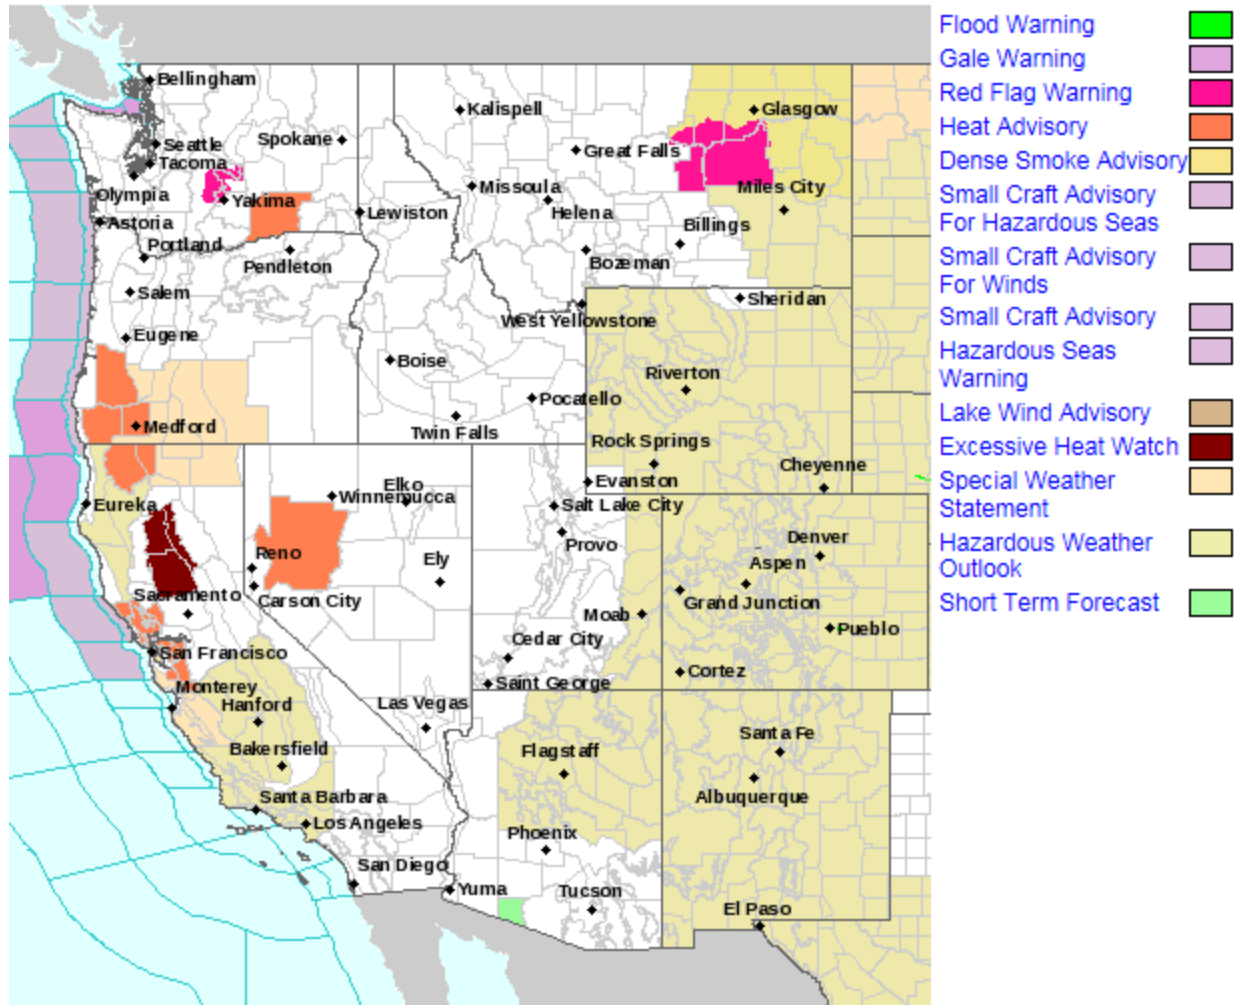

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

High pressure over the Great Basin and low pressure off the California coast will direct a flow of mid and high level monsoonal moisture across southern California for much of the week. This will support a chance of thunderstorms through Thursday, mainly near the mountains and portions of the deserts during the afternoon hours. Minor drying is possible for Friday and Saturday with another chance for afternoon thunderstorms for the mountains and deserts Sunday and Monday. Temperatures will peak today, and then cool to near average for Friday through early next week.

Southeast California Weather:

There will be some opportunity for showers to affect lower elevation desert communities during the middle of the week; however the most likely outcome will only be gusty winds and some blowing dust. Afternoon temperatures will remain slightly above normal this week before moderating back down towards normal by the weekend.
